I am a web developer with full-stack experience, but with an interest in the front-end of applications. In a previous career, I was a server. There are those in that field who just take your order and bring the food, but I provided a tailored guest experience, which meant a lot of laughter and repeat guests. I have learned that I really enjoy programming, and have gone to great lengths to improve my skills. I seek a role as a web developer at a company where I can learn, grow, and continue to master the craft.

Technical Skills			
HTML	Javascript	firebase	node.js
CSS	jQuery	APIs & AJAX	Bootstrap

Deployed Projects					
Guess That Word <i>html, css, & js</i>	Deployed	Github Repo	Gif-tastic <i>html, css, js, jQuery, APIs & AJAX</i>	Deployed	Github Repo
